

# Actual Diamond Size

Print this page to compare actual diamond sizes.

Before Printing: Make sure when you push the print option in adobe reader that "Page Scaling" option is switched to "None" i.e. the image wont be stretched or re sized since this will affect the scale of the stones on the chart. Since all CARAT\* stones are cut by hand, measurements are based on approximate equivalent diamond carat weight. Actual dimensions may vary slightly from stone to stone depending on small variations in cutting proportions.

Carat Weight: 0.25 0.50 1.0 1.5 2.0 2.5 3.0 4.0 5.0
